

360 Menu Partners CASE STUDY

Hospitality and leisure sectors

Across 400 UK sites

About 360 Menu Partners

360 Menu Partners provide an all-round Food solution for businesses in the hospitality and leisure sectors. They help deliver outstanding food to their client's customers, creatively and profitably.

360 Menu Partners clients' include operators of pubs, restaurants, coffee shops and leisure businesses and combined their clients' operate over 400 sites in the UK.

We have worked with CaterCloud for over a year now and prior to this we would be reliant on using our clients' own solution or using something in Microsoft Excel.

We have been able to migrate all our Excel based work onto CaterCloud, saving us approximately two days per menu development project or equivalent to 10% of the overall project time. This has been achieved as we have been able to bulk upload ingredients into the system, this includes all the data including pack size, price, allergens and nutritional information.

When we then build dishes in our menus, it takes a matter of a few minutes per dish to build the recipe, allergens and nutritional information for that dish and we can also quickly see the commercial viability of that dish. These are time savings that we are able to pass back to our clients's, saving them money!

In addition, we have been able to migrate a number of client's onto CaterCloud, one of which was a business operating seven sites and they have saved just over £4k PA by switching to the CaterCloud platform, due to it being FREE OF CHARGE.

James Mawer, Founder / Food Development Director

Live Dashboard

The screenshot shows the CaterCloud Live Dashboard for user Hi Gemma. The dashboard features a navigation bar with links for Home, Ingredients, Recipes/Dishes, Menu, Suppliers, Reports, Help, and Hi Gemma. The main content area is organized into several sections:

- Management Tools:** A grid of eight tiles for managing ingredients, recipes, dishes, menus, suppliers, order lists, stock takes, and accounts.
- Warnings:** Four tiles showing zero warnings for ingredients, recipes, dishes, and menus, each with a 'View warnings' link.
- Recent Items:** Two sections for 'Recent Ingredients' and 'Recent Recipes', both showing a message: 'You haven't modified anything yet.'
